## **MICROLINK WINS RM28.97 MILLION CONTRACT FROM NATIONAL AUDIT DEPARTMENT**

12 July 2023: Microlink Solutions Berhad has secured a contract worth RM28,966,282 (including 6% Sales and Service Tax) from the National Audit Department (Jabatan Audit Negara/JAN) to design, develop, and deliver a data warehouse, audit analytics application, audit dashboard, as well as hardware and other supporting infrastructure. This project aims to generate high-impact results that will empower JAN to make well-informed decisions by leveraging big data analytics, integrated data management, and data sharing across agencies. The outcome of this project will play a crucial role in strengthening JAN's main systems, empowering the delivery of enhanced auditing services, increasing fraud detection and facilitating policy changes through the adoption of new technologies for sustainable digitalisation.

The implementation of these innovative measures will also enhance efficiency and support the auditing and digital management processes, as well as improve JAN's ICT network and security infrastructure, thereby enhancing the efficiency of auditing work. The project also stands to enhance JAN's ICT infrastructure ensuring effective service delivery as well as guaranteeing the security and integrity of data. This commitment to data protection is crucial in an increasingly digital world where safeguarding sensitive information is of paramount importance.

The work on this project is scheduled to commence in August 2023 and development is expected to last for three years, concluding in July 2026. During this period, Microlink will work closely with JAN to develop and deliver these cutting-edge solutions and achieve the project's objectives successfully.

Microlink Group CEO Ramlee Abdullah, expressed the company's vision of providing "Data-driven: Actionable Insights" to clients through innovative data analytics solutions. By utilising data analytics, advanced algorithms and machine learning, Microlink's solutions can analyse extensive datasets to reveal patterns, trends, and correlations. This capability enables clients to unlock the full value of their data, leading to meaningful outcomes.
